In case of an emergency or if an alarm is activated while you are not on the premises we need to have a list of people we may notify. This should include work numbers, pager numbers, mobile numbers etc. Our standard procedure is to start at the top of the list and stop once someone is contacted. If we are unable to contact someone on the list we will periodically start this procedure again until someone has been contacted.

Please be aware, the persons on the list can not disregard the police from a dispatch unless you have given them the authority to do so. Please place an X in the box for each person you wish to have this authority.

				Disregard
